I can see the improvements of the original game, but I also see the slipping back. 1) the wolves, what in the world is going on with them?!?! The body shapes and things like that from the originals was great, it was more realistic in a way. Also, the adjustment thing is hard to figure out and to assess what's happening. 2) the camera, the viewpoint should always be set with my wolf unless I move it. So when I run and I turn, I don't want to have to pan the camera either. It's just much harder to get right that way. 3) the checks, maybe there should be a tutorial to walk you through everything. The controls to move seem much more complicated as well. 4) the names, I think this was a problem with the latter, not sure, but if you have it where a name can not be used someone else has it for their wolf, you will run out of decent, good, nonprofanic (making my own word there) names. 5) there should also be more jacket jacket and stuff like that, too. All of these can be improved, I love what you guys have done so far tho! You've got yourselves getting ready for a great game. Also!!!! Make sure to firewall your game or whatever. Make it so absolutely no hackers can ruin the game. If you put that in that privacy policy and user agreements, the fine print doesn't matter if you're not going to enforce it and if no one reads it. There should be account bans, from what they used to log in, Game Center, Facebook, whatever. I really love this game! Wolf Online 2 has a lot of potential, but instead of adding more to the game now. It would make more sense to improve (Bugs) what is now in play. I've encountered many bugs, such as when two wolves collide and latch at the same time, they will either rotate and teleport around the map until they fall under the map or land on the map. Another bug I randomly encountered occurs on the home screen. When I tried to enter touch here to start the game would not let me enter. Finally the latest and biggest bug/very annoying people are the hackers/modders I've already started to see speed hackers and a hit hackers... If 1Games doesn't do anything to them, Wolf Online 2 will just end up as: Wolf online, Dinos online, Wild Animals Online, Etc. These are just a fraction of all the problems/bugs in the game. As I said this game has great potential, but all 1Games has to do to make it better is first to solve the current problems and then take some ideas from the players and add what they would possibly enjoy. Thanks for reading my review. It's a good concept, but the wolf model... geez it is so difficult to adjust it with the wolf move ... and the wolf clips through the ground and the left front foot is literally so weird that it is different from the others because it literally angles up and the leg is flat and long and literally looks broken. The controls are so hard to understand because there is no tutorial. The walking is so hard to control because you literally hold and pull out the running bar, while moving, which means you don't even attack while running or moving the camera. A simple button would be much better. If you get coins you hardly get it and I played for an hour and did so many things but barely got 300 coins, while the first upgrades cost over 1300 coins! And it's so hard to hunt because you don't even attack while running. In the upper left corner it shows you your thirst hungry health and poo meter. My poop meter is always full, but I have no idea how to use it! I click on it, hold it, do everything, but can't even! MAKE A TUTORIAL PLEASE! Everything is so unnecessarily complicated! You could have kept it simple, like run button! Also the skins are so limited and weird.. but it's a good concept, but I can tell that there is a lot of slackening because your other wolf games looked much better. ★ ★ the developer, 1Games, did not provide details about its privacy practices and the processing of data to For more information, see the developer's privacy policy.
